

# Posts for Contec Fence System

## General considerations

Posts are used to provide support for Contec Fences and must be capable of withstanding wind loads applied upon them; while satisfying local, regional and national codes, such as Standard Building Code, Uniform Building Code, etc.

Use design methods, in accordance with nationally recognized organizations (American Concrete Institute, ACI; American Society of Civil Engineers, ASCE; and others), must be used.

Concrete posts or steel posts can be used for Contec Fence System. Fig. 12 shows typical concrete post sections.

## Post caps

Used as a decorative element over posts (see Fig. 13). The post cap should be fixed or glued, as determined by the post material.

**Note:** For more technical information about posts and bases, call Texas Contec.
